Office Action Summary	Application No. 10/630,816	Applicant(s) SCHEETZ ET AL.	
	Examiner Stephen J. Castellano	Art Unit 3727	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3727

Claim 4 is objected to as being incomplete because it depends from itself.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 10 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claim 10 limits the slits to a substantially closed state. Claim 10 contradicts the expanded and open state of the slits stated in claim 1. This is non-enabling.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 is dependent on itself. This is indefinite.

Claim 10 limits the slits to a substantially closed state. Claim 10 contradicts the expanded and open state of the slits stated in claim 1. This is indefinite.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3727

Claims 1-3, 5-9 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Curtis et al. (Curtis).

Curtis discloses an insulating sleeve for a beverage container comprising an expansible sleeve having a first (bottom) and second (top) openings, the sleeve defines a plurality of slits in the knit fabric of the sleeve, a beverage container is received within the passageway through the top opening, expanding the slits into an open position such that the sleeve conforms to the sidewalls of the container'

Re claim 2, the vertically oriented slits are found in wales (W1 and W3) and loops (L).

Re claim 3, the band region at the first (bottom) opening are non-expansible (see col. 2, lines 62-66).

Re claim 6, see Fig. 2 and 5.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Curtis in view of Christiansen.

Curtis discloses the invention except for the printed element. Christiansen teaches a printed element in column 6, lines 26-29. It would have been obvious to add a printed element to promote advertisement, to provide identification and to personalize the insulating sleeve.
